

Wintec Aluminium Profile

ULLTRACLAD[®]

Wintec Aluminium ULLTRACLAD[®]

- The Aluminium Weatherboard System that Breathes

Our Product

- With the advent of the “leaky home syndrome” Ullrich Aluminium decided that there had to be a better way to clad the outside of new homes. When Ullrich Aluminium developed ULLTRACLAD[®], an extruded aluminium cladding, special attention was paid to the way that air circulates behind the cladding allowing it to breathe and therefore eliminate the risk of your new home leaking and ensuring there was no possibility of rot.
- Ullrich Aluminium’s ULLTRACLAD[®] has been verified by BRANZ and complies with E2 for use with or without a cavity (depending on the risk factor) so can be used in all aspects of building, whether it be high rise, the family home or renovation. With an ULLTRACLAD[®] reclad of existing older homes the results look like new yet retain the original appeal of the dwelling. With its affordability, good looks and reliability it is fast becoming the recommended choice of architects and builders alike.
- The Ullrich Aluminium ULLTRACLAD[®] mounting system makes for ease of assembly and as it is a complete integrated system with its own flashing and corners it is without the maintenance and problems associated with other forms of cladding. The ease and speed with which ULLTRACLAD[®] is fitted and the fact that it is prefinished makes for faster construction time and less cost in scaffolding.
- Designed and manufactured by New Zealand’s aluminium producer, Ullrich Aluminium Company Ltd.

“The new generation in exterior cladding”

Wintec Aluminium ULLTRACLAD[®]

- Stands up to New Zealand Weather Extremes

Our Strength and Versatility

- Don't spend your weekends or family budget on house maintenance. Install ULLTRACLAD[®] an aluminium, maintenance free cladding system, designed and manufactured by Ullrich Aluminium for New Zealand weather conditions.
- With a massive 25 year warranty, ULLTRACLAD[®] has been extensively tested by BRANZ and will withstand all weather variables including high temperatures and very high wind up to cyclonic conditions as defined in NZS3604.
- ULLTRACLAD[®] is the ideal exterior cladding for the New Zealand home as it still has the look of the traditional weatherboard, but without the maintenance and problems associated with a timber cladding. It will go on performing year after year and still maintain it's good looks.
- ULLTRACLAD[®] is equally suited to classic or modern home styles giving architects the creative ability to design something special using product that will stand the test of time.
- Installation of ULLTRACLAD[®] is easy and you will be pleasantly surprised at just how affordable ULLTRACLAD[®] is.

"Sustained good looks, year after year"

Wintec Aluminium ULLTRACLAD[®]

- Excellence in Performance and Design

Our Design Initiative

- ULLTRACLAD[®] is an interlocking, durable aluminium cladding system complete with flashings, fixings and is powdercoated or anodised in a large range of colours.
- ULLTRACLAD[®] carries a BRANZ appraisal certificate and apart from being extensively tested in, up to and including, cyclonic conditions it is also fire rated to 60 minutes. Additionally it is lightweight and easy to install in either horizontal or vertical applications.
- The ULLTRACLAD[®] system consists of weatherboards, locators for hidden fixing, internal/external corner moulds, starter strips, board jointer soffit mould joinery flashings and accessories. The system is applied direct to the external wall framing with a locator over absorbent wrap.
- Supported strongly by Ullrich Aluminium branches throughout New Zealand, ULLTRACLAD[®] has the technical and sales support to meet your cladding requirements.

“Strongly supported by technical and sales staff”

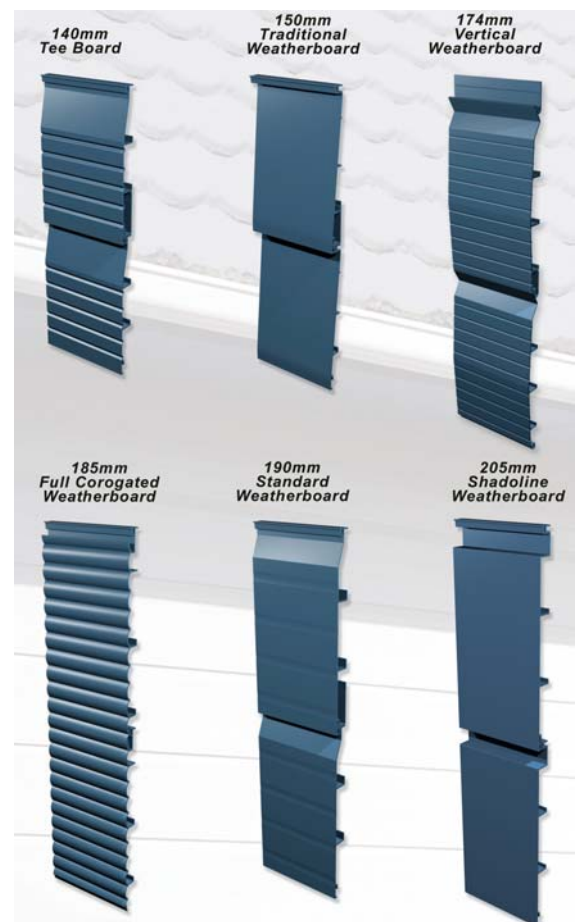

Wintec Aluminium ULLTRACLAD[®]

- The Permanent Cladding Solution for Today's Market

Our Board Profiles

- As part of ULLTRACLAD[®]'s continuing improvements, market trends and increased demands on a larger range, Ullrich Aluminium's design team have developed a new domestic/commercial type board to add to the current modern and classic range of weatherboard profiles.
- The boards are extruded from premium grade aluminium as a weatherboard profile with either a smooth finish (Traditional, Standard and now Shadowline), corrugated (Full Corrugate and Baby Corrugate) or grooved (Tee Board and Vertical).
When installed ULLTRACLAD[®] is effectively 15mm thick and ranges from 150mm - 205mm in depth. It is available in 5 and 6 metre lengths.
